

# PREPARING NIGERIA FOR THE POST-QUANTUM ERA

## ENTERPRISE QUANTUM MIGRATION PLATFORM (EQMP)

Governance-Driven Cryptographic Discovery,  
Risk Assessment & Migration

**PRESENTED TO:**  
**NIGERIA DATA  
PROTECTION COMMISSION  
(NDPC)**

**STRATEGIC  
BRIEFING**  
JULY 2026

**RESEARCH-INFORMED.**  
Driven by evidence and  
academic research.

**INDUSTRY-DRIVEN.**  
Built with real-world  
enterprise experience.

**BUILT FOR NIGERIA.**  
Designed for our realities.  
Securing our future.

**SCALABLE FOR AFRICA.**  
A foundation for digital trust  
across the continent.

# WHY THIS MATTERS

Modern economies  
are built on  
cryptographic trust.

TRUST IN THE DIGITAL ECONOMY **BEGINS WITH TRUSTED CRYPTOGRAPHY.**

# HARVEST NOW. DECRYPT LATER.

Data intercepted today can be stored and decrypted tomorrow when quantum computers become powerful enough.

The threat is real.  
The time to act is now.

## THE HARVEST NOW, DECRYPT LATER THREAT

### 1. INTERCEPT

Attackers intercept encrypted data in transit or at rest.

**01**

### 2. STORE

They store the data securely, waiting for future decryption.

**02**

### 3. QUANTUM BREAKTHROUGH

Quantum computers become powerful enough to break current encryption.

**03**

### 4. DECRYPT

Your sensitive data is decrypted and exploited.

**04**

What is secure today may not be secure tomorrow.  
Post-Quantum readiness starts with awareness and action.

THE LONGER WE WAIT, THE MORE WE RISK. **THE TIME TO PREPARE IS NOW.**

# THE INVISIBLE RISK WITH VISIBLE CONSEQUENCES.

Quantum threats don't break  
in today—they break in later.  
But the damage is real.

If we don't prepare today,  
we risk everything tomorrow.

## DATA EXPOSURE

Sensitive data stolen  
today can be decrypted  
tomorrow.

## FINANCIAL IMPACT

Fraud, loss of trust,  
regulatory fines, and  
huge recovery costs.

## LOSS OF TRUST

Customers, partners,  
and citizens lose  
confidence.

## THE RISK IS INVISIBLE TODAY

But quantum computers  
will reveal it tomorrow.

## STEALTHY ATTACKS

Attackers harvest now,  
decrypt later—without  
detection.

## COMPLIANCE FAILURE

Non-compliance with  
emerging regulations  
and standards.

## TIME RUNNING OUT

Quantum readiness  
requires time, planning,  
and investment.

THE RISK IS INVISIBLE TODAY.  
THE CONSEQUENCES WILL BE VISIBLE TOMORROW.

# OUR JOURNEY TO QUANTUM RESILIENCE.

A structured, risk-based approach to prepare today and protect for tomorrow.

Plan today.  
Protect tomorrow.

FROM ASSESSMENT TO ASSURANCE. FROM TODAY TO TOMORROW.

# OUR FRAMEWORK FOR CONFIDENCE.

A comprehensive framework that ensures secure, compliant, and future-ready migration to post-quantum cryptography.

Built on proven principles.  
Designed for the future.

## 01. GOVERNANCE

Strong leadership, policies, and oversight drive successful PQC adoption.

## 02. INVENTORY

Visibility into critical assets, dependencies, and cryptographic implementations.

## 03. RISK ASSESSMENT

Evaluate quantum risk exposure and business impact to prioritize what matters most.

## 04. MIGRATION STRATEGY

Define the right cryptographic approach, roadmap, and migration path.

## 05. IMPLEMENTATION

Deploy quantum-safe solutions with minimal disruption and maximum security.

## 06. ASSURANCE

Continuous validation, monitoring, and audit ensure long-term resilience.

## POST-QUANTUM CONFIDENCE

Secure. Compliant.  
Future-Ready.

A FRAMEWORK TODAY. **CONFIDENCE TOMORROW.**

# OUR WORKFLOW. CLEAR. CONNECTED. COMPREHENSIVE.

A streamlined end-to-end process that transforms complexity into actionable insights and measurable outcomes.

## LIVE DEMONSTRATION

We will now showcase the EQMP Technology Preview in action. See the workflow come to life.

**LIVE • REAL • IN ACTION**

## LIVE DEMONSTRATION

Experience the EQMP Technology Preview in real time as we walk through the workflow.

FROM DISCOVERY TO CONTINUOUS IMPROVEMENT.  
**DELIVERING POST-QUANTUM CONFIDENCE AT EVERY STEP.**

# EQMP VERSION 2

ENTERPRISE-READY VERSION

IS COMING SOON.

TARGET RELEASE

**9 AUGUST 2026**

## EQMP VERSION 2 WILL DELIVER

### Comprehensive Asset Discovery

Enterprise-wide visibility of cryptographic assets across all environments.

### AI-Powered Migration Intelligence

Intelligent recommendations to prioritize and accelerate PQC migration.

### Continuous Monitoring & Assurance

Real-time monitoring of cryptographic posture, risks and compliance.

### Policy & Compliance Automation

Automated policy enforcement, evidence collection and audit-ready reporting.

### Enterprise Scale. Future Ready.

Built for performance, resilience and security in the post-quantum era.

**ENET**  
TECHNOLOGIES

**QUANTUMGENIE**

## STRATEGIC TECHNOLOGY COLLABORATION

EQMP Version 2, the Enterprise-Ready Edition, is being developed in collaboration with QuantumGenie to deliver next-generation quantum migration capabilities.

# RESEARCH FOUNDATION.

OUR **BELIEF** DRIVES OUR RESEARCH.

## OUR BELIEF

The challenge is no longer post-quantum algorithms.  
The challenge is intelligent, context-aware migration.

### DOCTORAL RESEARCH PARTNERSHIP

**Manchester  
Metropolitan  
University**

#### PhD in Computer Science

Adaptive and Governance-Aware  
Post-Quantum Cryptographic Migration  
for High-Throughput Financial Systems

## RESEARCH. COLLABORATION. IMPACT.

Partnering academic research with industry innovation  
to build the future of secure, quantum-resilient systems.

**ENET**  
TECHNOLOGIES

**Manchester  
Metropolitan  
University**

## KEY RESEARCH PILLARS

### ADAPTIVE PQC MIGRATION FRAMEWORK

Dynamic and risk-aware migration planning  
for diverse enterprise environments.

### GOVERNANCE & POLICY INTELLIGENCE

Governance-aware models for compliance,  
policy alignment and decision support.

### CRYPTOGRAPHIC AGILITY & INTEROPERABILITY

Frameworks for algorithm agility, hybrid crypto  
strategies and system interoperability.

### RISK & READINESS ANALYTICS

Quantitative models for assessing organisational  
readiness and migration risk.

### CONTRIBUTING TO GLOBAL KNOWLEDGE

Advancing academic literature and industry  
best practices in post-quantum security.

# THE GLOBAL PQC MIGRATION LANDSCAPE.

Governments and industries worldwide are setting clear mandates and deadlines for post-quantum cryptography migration.

## UNITED STATES

### Federal Post-Quantum Migration Roadmap

**2024**

NIST publishes the first PQC standards (FIPS 203, 204 & 205).

**2025–2030**

Federal agencies complete cryptographic discovery and inventory.  
Migration planning and modernization of high-value systems.  
Critical infrastructure operators begin quantum-safe transition planning.

**2030–2035**

Progressive migration of National Security Systems.  
Retirement of vulnerable legacy cryptography where required.

## EUROPEAN UNION

### Coordinated EU PQC Roadmap

**By 2026**

National transition roadmaps.  
Cryptographic inventory and asset visibility.  
Migration planning and awareness.

**2030**

Priority migration across critical sectors with high impact and high risk.

**2035**

Broad transition toward quantum-resistant cryptography across the EU.

## UNITED KINGDOM

### NCSC Migration Timeline

**By 2028**

Complete cryptographic discovery.  
Build enterprise inventory.  
Develop migration plans.

**By 2031**

Migrate highest-priority services and critical systems.

**By 2035**

Complete migration of remaining systems and retire legacy cryptography.

### THE GLOBAL MIGRATION PATTERN

**DISCOVER**  
cryptographic assets

**INVENTORY**  
build visibility and insight

**PLAN**  
migration strategy and governance

**PRIORITIZE**  
focus on risk and business impact

**MIGRATE**  
implement quantum-safe solutions

**QUANTUM READY**  
resilient, secure and future-ready

## NIGERIA'S OPPORTUNITY

Build national cryptographic visibility today, establish governance-led migration planning, and prepare critical infrastructure and regulated sectors before post-quantum migration becomes an operational necessity.

### RESEARCH-INFORMED

Grounded in rigorous research and global evidence.

### GOVERNANCE-AWARE

Aligned to policy, risk and regulatory priorities.

### BUILT FOR NIGERIA. SCALABLE FOR AFRICA.

Delivering context-aware solutions with global relevance.

# THANK YOU. QUESTIONS?

We appreciate the opportunity to share our vision for a quantum-resilient Nigeria.

## EQMP

Enterprise Quantum Migration Platform

Empowering organisations today to secure tomorrow's digital future.

### QUESTIONS?

We are ready to engage and collaborate to strengthen Nigeria's cryptographic future.

### ABOUT ENET TECHNOLOGIES

We deliver innovative cybersecurity and digital transformation solutions that help organisations build trust, ensure compliance and strengthen resilience in a connected world.

**ENET**  
TECHNOLOGIES  
Innovate Securely

#### RESEARCH-INFORMED

Grounded in rigorous research, standards and global evidence.

#### GOVERNANCE-AWARE

Built for policy alignment, risk management and oversight.

#### OUTCOME-DRIVEN

Focused on measurable impact and continuous improvement.

#### COLLABORATIVE

Partnering with organisations to build a secure future together.

SECURE TODAY. RESILIENT TOMORROW. **QUANTUM READY.**

BUILDING TOMORROW'S **ENTERPRISE QUANTUM MIGRATION PLATFORM**—TODAY.
